## RESEARCH STATEMENT

I am a Ph.D. candidate in **Computational Linguistics** at UT Austin *expecting to graduate in May 2024*. I am interested in **Pragmatics**, **Computational Social Science**, and **Natural Language Processing**, with a focus on social dynamics (like intergroup bias) in communication.

## PROFESSIONAL SERVICE

### Organizing Committee

South by Semantics Workshop

2022–24

I am co-organizing [a series of talks](#) on semantics, computation and philosophy of language. Our goal is to provide a forum for emerging scholars with UT Austin's rich community of language researchers, and to foster collaboration and dialogue through social events organized with the talks.

Texas Linguistics Society (TLS) Conference

[2021–22](#)

TLS is an annual student-run academic conference by the Department of Linguistics at UT Austin which includes presentations in all areas of linguistics. I served on the organizing committee and was involved in reviewing and assigning submissions for review, website design, scheduling, logistics for a fully virtual conference, and chairing keynote sessions and talks.

### Reviewer

## **APPS**

**DeTeXt:** I built an open source app for iOS, iPadOS and macOS that predicts the best LaTeX commands corresponding to hand-drawn symbols using deep neural networks. Built using SwiftUI, Combine, PencilKit and CoreML, the app has over 10,000 downloads.
